WELCOME

The team at Yarram Park are once again excited to offer another quality draft of Young Bulls at this year's sale on Monday February 12, 2024. This year's bulls are presenting extremely well, after very favourable seasonal conditions have allowed the bulls to flourish and showcase their true genetic potential from the paddock.

At Yarram Park we are continuing our strong focus on growing out our bulls purely on a grass-based system to ensure their success in a commercial situation. We uphold high importance in managing our bulls under this system to guarantee longevity and underpin their performance under normal paddock conditions. This year's bulls have all been fertility tested to give our clients the extra peace of mind that all bulls are 100% ready to work and perform when they arrive on property.

All the above doesn't happen without a committed team and I'd like to acknowledge all personnel at Yarram Park and special mentions to Cattle Manager Mick Petersen for his continued dedication to the husbandry and presentation of the sale bulls and Rudelle McArthur for her thorough record keeping and organisation of logistics for both the field day and sale.

As we enter 2024, it feels like we are on a new price trajectory after widespread rain has instilled a new confidence in buyers and allowed a lot of cattle to find a paddock and some to finally stay in the paddock. Let's hope this continues and we can leave the adverse market conditions of 2023 well behind.

Once again, this year we will have all sale bulls on display on Friday the 2nd of February as part of the Stock and Land Beef Week field day. In the meantime, if you have any questions leading up to the sale on Monday the 12th of February don't hesitate to contact us here at Yarram Park or via your local agent.

Regards,

Craig Brewin

HERD HEALTH

EU Accredited:
3ARHT000

Vaccines

Vaccinated with the following Vaccines:

- 7 in 1
- Pestigard
- Vibrio

Drench

All Bulls have been drenched and will be drenched prior to leaving Yarram Park.

All bulls will be treated with Arrest.

Fertility

- All bulls passed semen analysis
- All bulls passed physical analysis

Trace Elements

Bulls Treated with the following:

- Vitamin ADE
- Multimin
- Vitamin B12

SALE DETAILS

INSPECTION

Ideally during our Beef Week field day on Friday 2nd February 2024 from 8.30am.
Otherwise by prior appointment or on Sale day, Monday 12th February 2024 from 9am EDST

CATERING

Morning tea and lunch will be available.

BUYERS REGISTRATION

The buyer's number system will be in operation, so all prospective purchasers will need to register prior to the sale.

AGENT REBATES

A 3% rebate to licensed agents who accompany their clients to the sale or participate on Auctions Plus.

PHONE BIDDING

Mobile phone service is very poor around the sale complex; however the sale will be conducted in conjunction with AuctionsPlus using their link phone system and video Livestream.

SELLING ORDER

The vendor and selling agents reserve the right to alter the selling order.

GST

All lots will be sold exclusive of GST.

INSURANCE

We recommend insurance, which can be arranged on the day with Elders. While all care will be taken with the Bulls prior to delivery, they become the purchaser's responsibility at the fall of the hammer.

DELIVERY

Will be available for those requiring trucking, and will commence from Tuesday 13th February

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

FEATURE AI SIRES

YARRAM LOTTERY Q135

One of the best young Bulls we have bred. Long and deep with great eye appeal, outstanding data and sired by our most prolific Bull H220. Retained for stud use with semen available for sale.

Market Target	Index Value	Breed Average
Southern Self-Replacing Index (\$)	+\$175	+\$128
Northern Self-Replacing Index (\$)	+\$157	+\$114
Southern Baldy Maternal Index (\$)	+\$178	+\$129
Northern Baldy Terminal Index (\$)	+\$123	+\$95

YARRAM PARK GENETICS - SEMEN AVAILABLE

The use of artificial insemination is the most cost-effective way of accessing leading performance genetics. Artificial insemination will enable you to add hybrid vigour to your herd that will substantially improve your breeding program and overall return.

Calved	Birth weight	200-day milk	200-day weight	400-day weight	600-day weight	Pigment
2019	+4.9	+22	+40	+60	+92	100/100
Scrotal	Carcase Weight	EMA	Retail beef	IMF %	Rump	Sire: YARRAM LOTTERY H220 (H) Dam: YARRAM ANGELA L170 (H)
+1.5	+70	+6.6	+4.3	-1.0	-2.2	

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

BWT Birth weight EBV (kg)

Based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of difficult birth.

SS Scrotal Size EBV (cm)

Calculated from the circumference of the scrotum, measured in centimetres and adjusted to 400 days of age. This EBV is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. Scrotal size is also positively associated with earlier age at puberty of Bull and heifer progeny.

Milk 200 day Milk EBV (kg)

An estimate of an animal's milking ability. For sires, this EBV indicates the effect of their daughter's milking ability on the 200-day weight of their calves

200 200 day growth EBV (kg) Calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400 400 day growth EBV (kg) Calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600 600 day growth EBV (kg) Calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days

and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MWT Mature Cow Weight EBV (kg) Based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age. Smaller, or more moderate EBVs, are generally more favourable.

EMA Eye Muscle Area EBV (sq cm) Estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals.

RIB Rib Fat EBV (mm) Estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBV% Retail Beef Yield Percent EBV (%) Represents total (boned out) meat yield as a percentage of a 300kg dressed carcass. A more positive EBV indicates percentage yield for the 300kg carcass size.

IMF% Intra-muscular Fat Percent EBV (%)

Estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 300kg carcass. Depending on market targets, larger more positive values are generally more favourable.

Australian Hereford Society Breed Average EBVs for 2022 Born Calves

Birth weight	200-day weight	400-day weight	600-day weight	Mature Cow Weight

+54	+4.0	+0.9	+1.2	+0.7
IMF%	SSRI	NSRI	SBMI	NBTI
+0.7	+143	+129	+147	+108

UNDERSTANDING HEREFORD SELECTION INDEXES

Selection indexes rank animals for a single production goal: profit. They take the hard work out of knowing how much emphasis to give each of the available growth, maternal, carcass and fertility EBVs when selecting parent animals - an index is a composite EBV of traits best suited to a particular production system and targeted market.

These indexes are calculated for all Hereford animals on the combined database and are derived using BreedObject software and Group Breedplan EBVs. They cover a range of targeted production systems and markets, and reflect the relative emphasis of a range of traits when breeding to improve long-term profitability to.

There are four breed-specific selection indexes for Hereford cattle provided for commercial cattle producers by the Australian Hereford Society:

- Domestic Southern Self-Replacing Index (\$) trade
- Short-fed markets (100-150 days)
- Long-fed markets (220 days)
- European Union

Typical production parameters, prices and costs underlie each selection index. Benefits and costs evaluated include both those for the sale animal from birth to slaughter and those for the sustainable cow herd.

In pasture phases, feed is assumed a limiting resource for a large part of the year and any increase in feed requirements is a cost item.

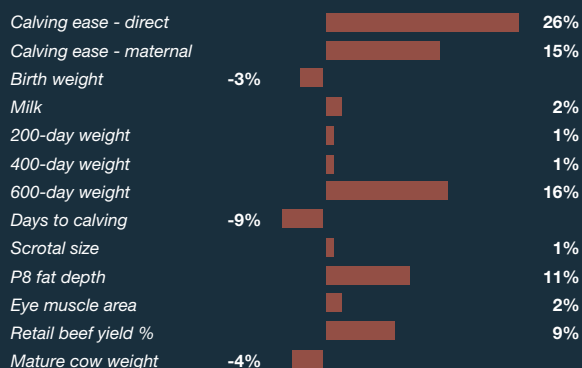

The assumed herd calving rate and level of calving difficulty reflect typical rates for Herefords, together with a moderate level of concern that these not change unfavourably.

The relative importance (%) of traits when breeding to optimise profit in commercial Hereford herds to three of the Hereford-specific market indexes are shown in the graphs on these pages.

Southern Self-Replacing Index (\$) Index

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd targeting pasture grown and finished steers for the domestic Southern Self-Replacing Index (\$) trade with no marbling requirement. Steers are assumed marketed at 475 kg live weight (240-260 kg HSCW and 10 mm P8 fat depth) at 17 months of age.

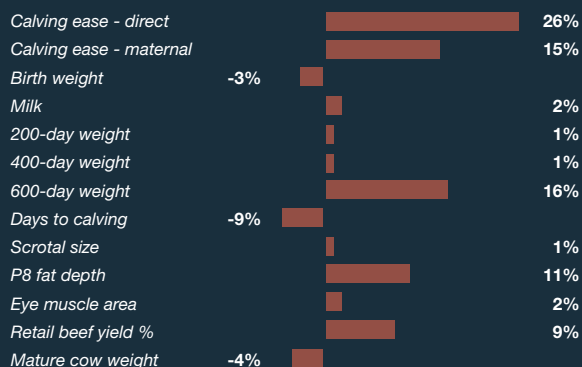

Relative importance (%) of traits:

Short-fed (100-150 Days) Index

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd producing steers for 100-150 day Southern Baldy Maternal Index (\$) markets with modest marbling (B1-B2). Steers are assumed marketed at 640-700 kg live weight (300-350 kg HSCW and 14 mm P8 fat depth) at 20-22 months of age, with a grain finishing period of 100-150 days.

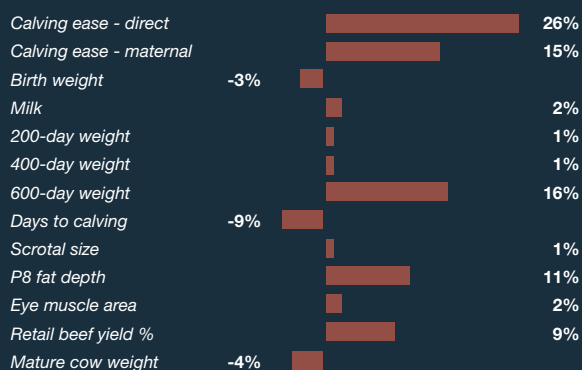

Relative importance (%) of traits:

Long-fed Export Index (220 days)

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd producing steers for the 200-250 day Southern Baldy Maternal Index (\$) export markets with a medium requirement for marbling (B2-B3). Steers are assumed marketed at 720 kg live weight (350-400 kg HSCW and 20 mm P8 fat) at 24-26 months of age.

Relative importance (%) of traits:

“

We have been using Yarram Park Bulls for 21 years now and are very happy with the progeny from these genetics. Over the last 12 years we have been selecting the top end Bulls, and also utilising Artificial Insemination with the leading sires from Yarram Park. This has definitely resulted in us achieving increasing weaning weights and a premium in the market. More importantly the quality of the females we have been retaining have been the real positive.

**John and Elizabeth Craig
Inverell Casterton**

“

Yarram Park bulls as fertile and the hybrid vigour created by crossbreeding the two gene pools has already proven its worth. Their ability to put on weight comes back to a natural doing ability. The first cross females from the Whiteface and Bos Indicus are valued as the ultimate mother.

**Brett Ellem - Manager
Yulgilbar Station**

“

My involvement in Yarram Park's Artificial Breeding program now spans over 33 years. During this time management and staff have given high priority to breeding cattle with confirmation, soundness, excellent temperament coupled with outstanding fertility, ensuring that the cattle have the capability to respond to management required to convert improved bodyweight at mating time despite trying seasonal and environmental conditions. The combined effort of Yarram Parks management skills and our synchronised program, results in 600 cows inseminated annually with a conception rate in the highest bracket of all herds inseminated by Nationwide Artificial Breeders.

**John Pickford - Manager
Nationwide Artificial Breeders Pty Ltd**

“

Using Yarram Park Bulls has improved the consistency, predictability and reliability of our Hereford progeny. We have found that Yarram Park genetics has increased length, muscling and confirmation of our weaners.

Our Hereford herd produces smooth dark coated, easy doing cattle with good temperament. These traits can be attributed to the use of Yarram Park Bulls and their superior Hereford genetics. Our enterprise looks for the following performance traits when purchasing stud Bulls such as; milk, eye muscle area, ease of calving, growth, structural soundness and temperament. Yarram Park Bulls tick all these boxes. From experience, the sort of after quality that is found at Yarram Park ultimately translates to more cents per kilo for our cattle.

**John Bergamin
Nanjomara Bergamin Pastoral Co
Willow Grove VIC**

FURTHER INFORMATION ON SEMEN PACKAGES

NATIONWIDE ARTIFICIAL BREEDERS

- Complete AI Service
- Pregnancy testing
- On-farm Semen collection
- Semen Testing
- Bull Fertility Testing
- Freeze branding and dehorning

John Pickford and the team at Nationwide can help you obtain semen from companies locally and around the world, inseminate your cows on a daily basis, freeze brand and dehorn your calves. Annually, NAB inseminates 200,000 cows, collects 143,000 doses of semen on farm, performs 8,500 bull semen tests, dehorns 11,000 calves and freeze brands 18,000 cows.

Other services include semen storage, liquid nitrogen top-ups and DIY supplies. Offices are in Noorat and Hamilton.

Call John on 0428 529 413 or Drew on 0428 925 255 – all hours.

Yarram Park recommends and has utilised Nationwide AB for 33 years.

Total Livestock Genetics

- Embryo and semen services
- Quality assured genetics

Total Livestock Genetics (TLG) is audited annually in its animal welfare, semen collection and processing techniques and quality control procedures. It is accredited with the National Association of Animal Breeders and is the only centre outside North America who can use the CSS logo that attests to the world's best practice conducted by the organisation.

Laboratories are export-approved and run by highly qualified personnel. TLG services many international clients who demand this level of quality assurance.

Make sure your AI program begins with Quality Assured Semen through TLG.
